

# Luxury ECommerce Platform

## Client Progress Summary

**Status:** 85% complete — on track for deployment.

All core development is finished including frontend, backend, payment processing, and CMS. Final deployment depends on database setup, environment configuration, and product content population.

### **Key Features:**

- Custom ring configurator with real-time pricing
- Secure Stripe checkout
- Customer accounts, wishlists, and order tracking
- Real-time inventory and order management

### **Next Steps:**

1. Production database setup
2. Final testing and verification
3. Add product descriptions and images

### **Launch Recommendation:**

Quick launch possible in 2–3 days after database and content are ready.
