

07-04 Meeting: Jewelry Website Homepage Redesign and Bespoke Timeline

Date: 2026-07-04

Location: [Insert Location]

Participants: [Speaker 1] [Speaker 2] [Speaker 3]

Meeting Notes

Homepage Design and Layout

- The hero section is the primary focal point on the homepage—the first element users see.
- The existing hero section will be updated. Under the “for her” and “for him” areas, the images will be replaced with a concise timeline that links to the full interactive bespoke timeline page.
- The fine jewelry section will be streamlined.
 - Instead of a carousel, it will display three distinct images: one each for bracelets, earrings, and pendants/necklaces.
 - A simple title “fine jewelry” will appear above these images.
 - Users will click a single button to explore fine jewelry, rather than multiple options in this section.

Interactive Bespoke Timeline and Registration

- The full timeline page will be interactive, revealing new elements as users scroll.
- The journey will progress from the timeline to a CAD design section, concluding with a call-to-action: “contact us to book your complimentary consultation.”
- A more interactive user registration form will be implemented.
 - The form will be broken into smaller steps to reduce friction and improve completion rates.

- A “Start your bespoke journey” button will be placed at the top of the page, linking users directly to the interactive timeline.

Website Styling and Features

- The color scheme will be revised. The current gold-and-brown combination is not working well; the recommendation is to use a simpler brown-and-white palette.
- WhatsApp integration will be added for instant communication.
 - Initially, this will be a simple button linking to the business WhatsApp, potentially with a pre-filled message.
 - A more advanced bot integration may be considered in the future.
- The Education Hub section was reviewed. Its content—especially the diamond guide—needs to be verified for accuracy.
- An image of a shank (ring mount) needs to be replaced because it appears odd.

Final Steps and Testing

- A test payment will be conducted next week using a dummy card to confirm that the payment system and Shopify account function correctly.
- A new business email address will be created.
 - Suggestions include “inquiries@” or “ask@” for a professional, simple tone, avoiding “hello@”.

Next Arrangements

- [] Replace images in the hero section with a brief timeline that links to the interactive bespoke timeline page.
- [] Redesign the fine jewelry section with three static images (bracelets, earrings, pendants/necklaces) and a single “Explore” button.
- [] Revise the website’s color scheme, moving away from gold accents to a simpler brown-and-white palette.
- [] Integrate a WhatsApp button for direct contact (with optional pre-filled message).
- [] Review and correct the content in the Education Hub, with emphasis on the diamond guide.
- [] Replace the inaccurate image of the shank/ring mount.

- [] Conduct a test payment next week using a dummy card to verify Shopify/payment functionality.
- [] Create a new professional email address (e.g., "inquiries@" or "ask@").
- [] [Speaker 1] will send a reference website link to [Speaker 2].
- [] [Speaker 1] will contact Blue Light after the website is fully completed.

AI Suggestions

AI Suggestions

AI has identified the following issues that were not concluded in the meeting or lack clear action items; please pay attention:

1. The specific content for the brief timeline on the homepage was not finalized.
2. The new color scheme was discussed, but the exact colors (e.g., specific shades of brown and white) were not decided upon.
